

Exercise 1: Open a file

Write a function that opens a file (input: filename), and prints the file line by line

Exercise 2: Wordcount

For a text file.

- (a) Find the 20 most common words
- (b) How many unique words are used?
- (c) How many words are used at least 5 times?
- (d) Write the 40 most common words, and their counts, to a file

Exercise 3: Transform

Read an English text file, and convert its uppercase letters to lowercase letters, and lowercase letters to uppercase letters, and save the converted result as a file named 'Result.txt'
